(a) outcome
fraction of seeds
predator starvation time N (ticks)
coexistence
predators extinct
both extinct
(b) mean levels: ABM vs fitted equilibrium
mean population (2nd half)
N
ABM prey
ABM predators
chain-LV equilibrium
(c) oscillation amplitude
coefficient of variation
N
prey CV
predator CV
(d) cycle period
period (ticks)
N
ABM (autocorrelation)
RM LV prediction 2π/Im λ
chain LV prediction 2π/Im λ
